## Cough screen

Flexible use with different variants

The cough screen, also going by the name corona-shield, provides the optimal protection for employees that are in direct contact with the customer. It is available in 3 different sizes and can be installed without drilling for a quick and flexible use.

Less risk

This mobile hygiene barrier reduces the risk of a droplet transmission (e.g. corona virus) acting as a sneeze guard while still enabling a flawless exchange of money or documents.

Comfort thanks to a safe stand and large opening to pass through

The convex shaped construction in combination with the feet included in the delivery, enables a safe stand for example on sales counters, in pharmacies or medical practices. Made of acrylic material, also called plexiglass, makes the item lightweight and shatterproof. Take responsibility and protect your employees against an infection.

- ✓ Strong stand due to the curved shape
- ✓ Simple assembly without tools
- ✓ Protect employees from droplet
- ✓ Made of high quality PMMA

Article Number	Dimensions H x L x D
CS-80X48	805 x 475 x 275 mm
CS-60X80	605 x 805 x 275 mm
CS-80X100	805 x 1005 x 275 mm
