

# Sensiflex Foam - MK116

Nitrile foam coated, 13 gauge seamless nylon glove.

CAT II BS EN420:1994

Size guide S, M, L, XL

**Cleaning/Maintenance** Both new and used gloves should be thoroughly inspected, especially after cleaning treatment and before being worn, to ensure no damage is present. Gloves should not be left in a contaminated condition if re-use is intended and should be cleaned as much as possible provided that no serious hazard exists before removing from hands. Excess contamination should first be removed and the gloves dry cleaned or laundered as appropriate. Leather gloves should have Lanolin put back into them in the final part of this treatment. Gloves that are cut, burnt or punctured or showing signs of fraying must not be used. If in doubt, do not use and seek professional advice.

**Transportation/Storage** Gloves should be transported and stored in dry conditions and where possible, in the original packaging.

**Obsolescence** When stored as recommended the gloves will not suffer any change in mechanical properties. Service life cannot be specified and depends on application and responsibility of user to ascertain suitability of the glove for its intended use.

**General** None of the raw material or processes used in the manufacture of these products is known to have any harmful effects on the wearer.

EC type examination carried out by: Satra, Satra House, Rockingham Road, Kettering, Northants NN16 9JH. Notified body No. 0321.

Approved To:

Marking on glove - Mainline, CE mark and model designation

Results are taken from the palm area of the gloves. Other surfaces may have reduced performance.

The information contained herein is intended to assist the wearer in the selection of Personal Protective Equipment. The results of physical tests should also help in glove selection, however it must be understood that actual conditions of use cannot be simulated and it is the responsibility of the user to determine the glove suitability for its intended use.
