

Increase workplace safety and compliance

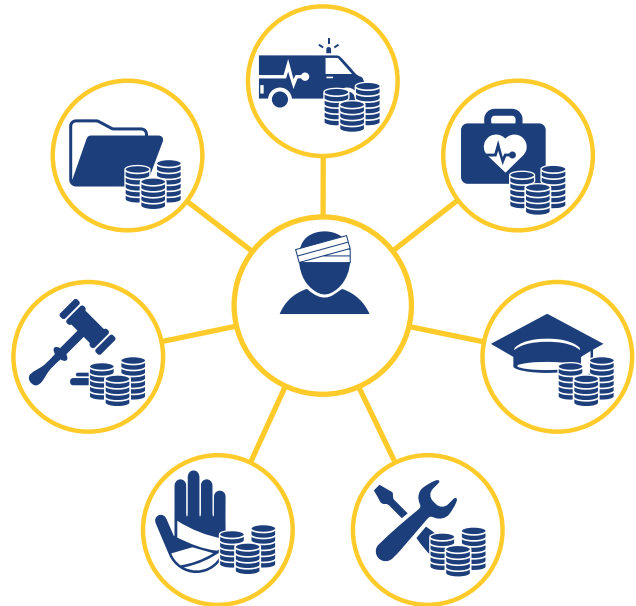

with Brady's Safety Identification Solutions

Increase safety

Managing safety risks to prevent workplace accidents from happening is both a humane and an economically sound strategy to protect or even improve company profitability. Every workplace accident generates cost, and potentially includes a severe human toll that impacts morale and productivity.

Every accident can have a severe human cost, and almost always generates significant indirect costs. These can include:

- time lost by an injured employee
- time lost by employees and supervisors attending the injured employee
- clean up and start up of operations interrupted by the accident
- time to hire or to retrain individuals to temporarily replace the injured employee
- time and cost for repair or replacement of any damaged equipment or materials
- cost of continuing all or part of the employee's wages, in addition to compensation
- reduced morale among employees, and perhaps lower efficiency
- increased insurance rates
- cost of administrative follow-up and paperwork

Brady's safety identification solutions are aimed at preventing workplace accidents, increasing efficiency and protecting productivity.

Why Brady

Brady Corporation has over a 100 years of experience in identifying and protecting people, products and places by providing durable, mission critical identification solutions that can withstand harsh environments. Our material science expertise and hassle free printing solutions enable customers to increase workplace safety and compliance everywhere in the world.

Increase compliance

Almost every country, and also the European Union, lays down a number of requirements workplaces need to comply with in order to avoid workplace accidents and protect workers.

Brady offers durable safety identification solutions to quickly align any facility with technical standards, national legislation and EU Directives.

European Union

- Directive 89/391/EEC to adequately protect workers
- Directive 89/655/EEC to protect employees servicing equipment
- Directive 92/58/EEC to provide safety signs (Annex II, III, IV, V and VI)
- Directive 2000/60/EC on the protection of water
- Directive 1272/2008 on the Classification, Labelling and Packaging of chemicals (CLP)

Denmark

- DS 134 - Identification colours and letter codes for drawings and pipelines

Finland

- SFS 3701 - Identification colours and signs for marking pipelines

Norway

- NS 813 – Identification colours for marking pipelines

Sweden

- SS 741:1017 - Identification for gas, liquid and ventilation installations
- AFS 2017:43 - Chemical Hazards in the Working Environment
- AFS 2006:04 - Use of work equipment

Comply with any standard

Brady's highly customisable identification solutions enable companies to comply with any standard, norm or legislation while increasing workplace safety.

Contact us with specific requests!

Lockout/Tagout

Why?

Lockout/Tagout can avoid workplace accidents during maintenance.

How?

By isolating machinery from its energy supply using a prescribed step-by-step machine specific procedure, padlocks and dedicated lockout devices.

Offer

Brady can deliver a complete Lockout/Tagout solution including expertise, procedure writing software and services, and Lockout/Tagout equipment.

Spill Control

Why?

Spill control can prevent slips and falls in the workplace.

How?

By enabling fast and easy disposal of fluids and preventing them from spreading on the work floor or polluting the environment. Spill control solutions are available as dry granules or in a variety of shapes.

Offer

Brady offers a wide range of spill containers and polypropylene rugs, soacs, pads, pillows and mats for both preventive and reactive use.

Pipe Marking

Why?

Pipe markers help caution employees, contractors and the fire brigade in case of leaks or when using valves.

How?

Pipe markers quickly communicate flow direction and potentially dangerous pipe contents. They are available in multiple colour codes, various sizes and a variation of pipe marker attachment or carrier systems.

Offer

Brady offers almost every pipe marker next to on-site printing capabilities to create your own.

Area Marking

Why?

Area marking helps prevent accidents caused by moving objects or reduces the severity of accidents because emergency equipment could not be reached in time.

How?

Area marking is useful to mark warehouse sections, loading docks, forklift areas, traffic lanes, emergency equipment and safe walking areas.

Offer

Brady offers a range of durable area marking solutions, including permanent and removable products in multiple colours for functional coding.

Safety Signs

Why?

Safety signs help to save lives and enable compliance with legislative requirements.

How?

Safety signs are a practical solution to quickly communicate prohibition, obligation, caution, evacuation, fire fighting, emergency and rescue information when and where this information matters most.

Offer

Brady offers all ISO 7010 safety signs and customisation options to create any sign you may need.

Visual Tagging

Why?

Visual tagging helps avoid accidents due to malfunctions with forklifts, ladders, scaffolds, drills, safety harnesses and other tools and equipment.

How?

Visual tagging shows the latest equipment inspection and test status on the equipment itself using a holder with removable inserts.

Offer

Brady offers a complete and customisable range that can tag any tool without impacting its use.

Safety Software

Why?

Safety software enables Safety Managers to quickly implement safety identification solutions when they are needed.

How?

Safety software provides digital workflows for procedure approval and enables the design of a wide variety of safety signs, pipe markers, area markers and energy isolation point tags.

Offer

Brady offers professional and intuitive software and apps to design safety identification solutions or to create, edit, approve and print safety procedures for multiple sites.

Safety Printers

Why?

On-site identification printing capabilities increase safety and save precious time by not having to wait for shipments. They also eliminate the need to store various safety signs for future use.

How?

With a few consumables, you can print any sign you need, when you need it. Safety printers enable you to print durable safety signs, pipe markers, area markers, energy isolation point tags and even safe work procedures on-site and on demand.

Offer

Brady offers specialised thermal transfer and inkjet printers to create mono-, multi and full colour safety signs and pipe markers in various sizes with durable materials for both in- and outdoor use.
